

**EQUICENTER**  
AT THE WILLIAM & MILDRED LEVINE RANCH

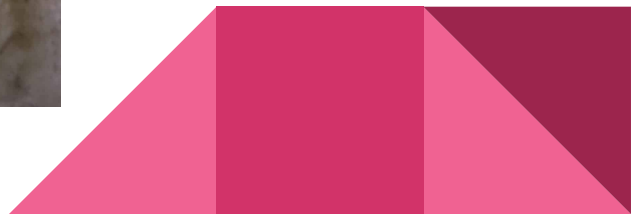

# Horse Teeth

Level 1

Horses have teeth so  
they can eat and chew

Grass  
Grain  
Hay

Horses can look very funny when they show their teeth...

Horses show their teeth when they yawn...

Horses show their teeth when they are smelling...

Horses show their teeth when they whiney...

Keeping a horse's teeth healthy is very important.

Once a year the vet comes to file the teeth down so they are smooth.

If the teeth are healthy the horse can keep eating all his/her favorite treats.

Since horses have teeth it is important to feed them from a bucket or bowl.

# Annual Dentals
